Service-Disabled Veteran-Owned Small Business Partners

Symphony Consulting Group, Inc. is committed to bringing commercial and Government best practices to meet operational and business challenges faced by our clients. Our success has come through the recognition that every client is unique, but lessons learned and tested solutions often provide a strong foundation for solving complex problems. Symphony is involved in some of the most interesting and highly visible projects for the DoD and the Department of Veterans' Affairs. Our strength is in our project management capabilities and a clear understanding of operational issues surrounding our client's IT solution implementation and change management requirements.

MicroTech, LLC is an IT enterprise transformation and engineering services company that is both a certified 8(a) and a SDVOSB. They provide "end-to-end" engineering and IT services to Federal, State, and Local Government Agencies. They provide Network/Information systems sustainment and staffing support, and a variety of information sharing applications. MicroTech also has done numerous database administration projects as well as business process re-engineering and active directory/exchange implementation.

Martin, Blanck and Associates, Inc. is a consulting firm to the healthcare industry and major health information management and technology companies. M&A provides healthcare policy and program development, management, informatics, strategic planning advice, training management, healthcare studies and analytical support to local, national and international organizations in both the public and private sectors.

Professional Solutions, LLC (ProSol) is an agile Service Disabled Veteran Owned Small Business (SDVOSB) which receives 90% of its new business from referrals. Founded in 2002, ProSol is headquartered in Alexandria, VA, and holds a Top Secret facilities clearance. They focus on three main areas: IT Support Solutions, Training and Distance Learning, and Analytical Support. Specific niche areas of expertise that they possess include enterprise architecture, requirements analysis, information assurance, database design and development, systems analysis, program management, and intelligence analysis, and training. ProSol's purpose is to support our
